

GET THE RIGHT EQUIPMENT BUT THE **WRONG GRILLE** AND THE DIFFERENCE CAN BE CHILLING.

There are panel floor grilles, roll-out floor grilles and linear bar grilles, curved blade ceiling grilles and single or double deflection grilles, even egg-crate grilles and non-vision grilles. Unless you know exactly what you're doing, making the wrong choice could create anything from a freezing office to a sweltering boardroom.

One of the leading brand divisions of Ruskin Air Management, Air Diffusion has been helping customers avoid such climactic miscalculations for over 30 years.

Our product testing and development, led by the group engineering and design team, never stops. And prestigious projects like the £23m Life Sciences Building at Reading University are among the many to have taken advantage of our specialist skills.

At Air Diffusion we can generate creative air solutions for most applications. So you never have to go to extremes to get what you want.
